FLOOR PLAN

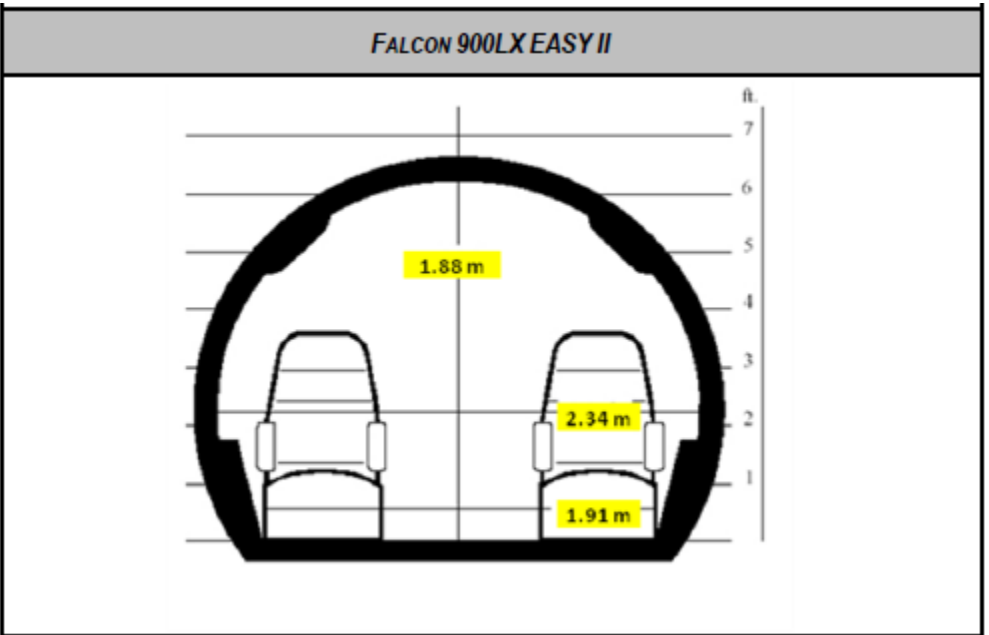

Interior

The Falcon 900LX cabin gives you space, abundant natural light and welcome quiet. The quality of the supple leathers, polished veneers and soft carpeting create an interior space that feels as good as it looks.

This long cabin allows you to enjoy three separate living areas. So you can relax over a fine meal served from your full galley, or work in your airborne office that is just as connected and equipped as the one you're used to. There is even the space for you to sleep peacefully as you travel the globe.
